AMER-BAC

LIQUID ALIVE BACTERIA

For Professional Use Only

Consult the label and
MSDS before using

SAFE NONTOXIC TREATMENT THAT DIGESTS AND LIQUEFIES ORGANIC WASTES

- OVER 67.5 MILLION MICROORGANISMS PER ML
- NONPATHOGENIC, NONTOXIC, NONACID, NONALKALINE,
- NONPOLLUTING
- REDUCES SUSPENDED SOLIDS
- ELIMINATES THE TOUGHEST MALODORS

PRODUCT NUMBER: **300#/601# Quarts**
501# Bulk

DESCRIPTION:

Recommended for urinals, trash chutes, dumpsters, grease traps, drain lines, porta-toilets, septic tanks, recreational vehicles, sumps, wet wells, drinking fountains, and condensation pans. AMER-BAC is one product that does many jobs. Use AMER-BAC to control odors anywhere, even odors due to pet urine that has soaked into carpeting or wood flooring. AMER-BAC instantly eliminates all malodors on contact while continuing to digest and liquefy organic wastes. Use AMER-BAC on a preventative maintenance schedule to keep drain lines flowing freely. AMER-BAC really works, use in urinals, toilets, or in mop water to get a handle on uncontrollable restroom odors. For maximum results, ask your AIS representative about our automatic dispensing system for maintenance of your drains or deodorizing of your trash chutes and dumpsters. Our automatic system saves labor plus eliminates wasted product due to overuse.

DIRECTIONS FOR USE:

Grease Traps: For traps less than 20 cubic feet capacity, add 4-5 ounces of product daily by pouring in a sink or pipeline closest to the trap. This should be done at night or when traps are used the least. After adding, flush down with a cup of lukewarm water. For grease traps larger than 20 cubic feet add 8-10 ounces daily using the same procedure.

Septic Tanks: Add 1 pint per 25 cubic feet capacity, for the initial treatment. Thereafter, use 8 oz. per week. This should be poured directly into toilet and flushed. If septic tank has become clogged and odorous, add 1 gallon of product directly into the tank through the manhole.

Recreational Vehicles and Boats: Add 2 oz. per gallon of water in hold tank. Thereafter use 1 oz. per 50 gallons of tank capacity. Then use one pint per week for maintenance.

FOR TRASH CHUTES, URINALS AND DUMPSTERS: Attach trigger sprayer and mist surfaces completely starting from the top working to the bottom.

DRAIN LINES AND DOWN PIPES: Use product a minimum of 4 times depending on the usage of the building. Add product in amounts listed below, start on the lowest floor and work up at the rate of one floor every day. Do not treat the same floor twice. When the top floor is reached, continue treatment from the top floor only. Use 2 times per week.

Pipe Size Dosage:

- 2" pipe, use 4 oz.
- 4" pipe, use 8 oz.
- 6" pipe, use 12 oz.
- 8" pipe, use 16 oz.

ADDITIONAL INFORMATION:

Alive Bacteria eat organic waste. AMER-BAC eliminates malodors by digesting and liquefying the waste so the smells will not return. The longer it can stay on an area, the more the good bacteria reproduces to increase effectiveness. In drain lines, AMER-BAC creates a natural digestive process to prevent future clogging. AMER-BAC is best used on a preventative maintenance schedule to insure that your drains flow freely. Ask your sales rep about available scents of AMER-BAC that freshen the room immediately while alive bacteria go to work destroying the cause of odor.
