DESCRIPTION:

REJUVENATE is like a pumice stone in a bottle. It works in seconds like no other product available. Just squirt on and rub off. Removes rust and stains immediately. REJUVENATE should not be used as an everyday toilet bowl cleaner.

DIRECTIONS FOR USE:

This product quickly removes hard water residue, rust stains and soap scum. For best results, remove water from toilet bowl or urinal. Pour 1 to 2 ounces of cleaner over brush or mop and thoroughly clean vitreous areas. Flush bowl. Rinse mop. Do not use on other than vitreous surfaces.

ADDITIONAL INFORMATION:

REJUVENATE Bowl Ring and Rust Stain Remover is an amazing product that can bring back the life and color of badly neglected bathroom fixtures. Rust stains and water rings can form on porcelain and vitreous surfaces like bowls, urinals, troughs and sinks. After months of neglect, white or colored surfaces will turn black. These ugly stains can be impossible to remove with conventional products and ultimately the fixture is replaced and the process starts all over. REJUVENATE will remove the “impossible” ring or stain from these vitreous surfaces. Bathrooms in apartments and public restrooms may only get an opportunity to refurbish the unit once every couple of years. If the bathroom fixtures have been neglected over this period, REJUVENATE is the only way to save the cost and trouble of replacement. REJUVENATE will restore fixtures to like new condition with one application. Nothing could be easier or more cost effective than REJUVENATE. Consult your local AIS representative for help with a restroom maintenance program that suits your company’s needs.
